Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 3, drawn to a storable transfer conveyor with powered rollers, classified in class 198.
 - II. Claims 4-6 and 10, drawn to a storable transfer conveyor with a lift means and motorized caster wheels, classified in class 198.
 - III. Claims 7-9 and 11-12, drawn to a storable transfer conveyor with bundle breaker and hydraulic left mechanism, classified in class 225.
 - IV. Claims 7-9 and 13-14, drawn to a storable transfer conveyor with a bundle breaker and projection member and stop member, classified in class 225.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the invention group I has separate utility such as it could be use without the bundle beaker of group IV; conversely, the bundle breaker of group IV could be used without the powered rollers of Group I. See MPEP § 806.05(d).
3. Claim 1 links the inventions of groups I-IV. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claim 1. Upon the allowance of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending from or otherwise including all the

Art Unit: 3724

limitations of the allowable linking claims will be entitled to examination in the instant application. Applicants are advised that if any such claims depending from or including all the limitations of the allowance linking claims is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejection over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. In re Ziegler, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP 804.01

4. There is an excessive burden on the office to examine all of these inventions together, as shown by their search. See MPEP (808.02(C)). For example, the device of Group I will need to be searched in class 198, along with a unique text search. Group IV would not be searched as above, but would instead be searched in class 225 accompanied by a different text search. Groups II-III also would have unique searches.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
